PROFILE

Full Stack Software Engineer with **3+ years of experience** in developing scalable web applications across **fintech, retail, and enterprise domains**. Experienced in **backend and frontend development**, system integration, and **API-based architectures** using modern Microsoft technologies. Strong background in **Agile environments**, production support, **CI/CD pipelines**, and performance optimization. Proven ability to deliver secure, maintainable, and business-driven software solutions.

TECHNICAL SKILLS

- **Programming Languages:** C#, JavaScript, SQL
 - **Front-End:** HTML5, CSS, SASS, JavaScript, jQuery, React.js, Bootstrap, Material UI, Tailwind CSS
 - **Back-End:** C#, .NET, ASP.NET MVC, Web Forms, Blazor, ADO.NET, Entity Framework, RESTful APIs, API Integration, Microservices Architecture, Troubleshooting
 - **Databases:** MySQL, SQL Server, Oracle, MongoDB
 - **Reporting:** SAP Crystal Reports, Jasper Reports
 - **Cloud / DevOps:** Microsoft Azure Cloud, AWS (foundational understanding), CI/CD Pipelines, GitHub Actions, Version Control (Git, Bitbucket)
 - **Testing / Quality:** Unit Testing, Integration Testing, Test-Driven Development (TDD), Code Reviews, Security Best Practices, Performance Optimization, Troubleshooting
 - **Methodologies / Practices:** Agile-Scrum, Waterfall, SDLC, Mobile-First Design, Continuous Integration / Deployment, Usability Testing, Team Collaboration
 - **Fintech Tools:** Temenos Infinity, Core Banking Systems, Financial Software, Data Management, Compliance
-

PROFESSIONAL EXPERIENCE

Software Engineer / Full Stack Developer, UBL (United Bank Limited)
Lahore, Pakistan

Nov 2023 – Aug 2025

Pakistani bank with a customer base of over 10 million and more than with 10,000 employees

- Developed **enterprise-grade web applications** using **ASP.NET MVC, Web Forms, and .NET frameworks**, improving system reliability and compliance with quality assurance regulations.
- Built **core banking solutions on Temenos Infinity**, modernizing digital account onboarding and improving overall service delivery.

- Managed **SQL Server, Oracle, MySQL, and MongoDB** databases; implemented **indexing, query optimization, troubleshooting, and performance tuning** to ensure high availability and fast response times.
- Supported **production systems**, responding to incidents, troubleshooting outages, and restoring services while minimizing business impact.
- Conducted **root cause analysis (RCA)** and implemented long-term fixes to improve service reliability and stability.
- Applied **DevOps practices** including CI/CD pipelines, version control, automated deployments, code reviews, and testing.
- Automated reporting processes using **SAP Crystal Reports and Jasper Reports**, enabling faster insights and supporting decision-making across departments.
- Implemented **API integration and microservices development** to streamline banking operations and enhance system scalability.
- Applied **object-oriented design principles**, design patterns, and code optimization techniques to improve maintainability.
- Collaborated with cross-functional teams in **Agile-Scrum and Waterfall** environments, improving delivery speed and software quality through **code reviews, unit testing, troubleshooting, and continuous integration**.

Junior Front-End Web Developer, NexQuery (Pvt) Ltd
Lahore, Pakistan

Jun 2022 – Aug 2023

Start-up software development company providing customized software solutions to businesses

- Built **responsive websites and mobile-first applications** for banking, fintech and startups in a fast-paced setting resulting in positive feedback from management and a 100% completion rate before the due date.
- Developed scalable UI with **React.js, Node.js, Tailwind CSS, and Bootstrap** following business requirements for project.
- Converted UX/UI designs into **production-ready code** using attention to detail skills improving usability scores.
- Implemented **API integration and backend connectivity**, supporting scalable front-end functionality and efficient data retrieval.
- Optimized code performance through **debugging, troubleshooting, and refactoring** to improve stability and security.
- Supported the **Software Development Life Cycle (SDLC)** including planning, design, development, testing, and deployment.
- Reduced release cycles through **Agile coordination** with product and QA teams.

VOLUNTEER EXPERIENCE

Website Development Assistant (Volunteer), Muslim Literary Festival
Ontario, Canada (Remote)
